

Luxembourg, 3rd February 2012

Press Release

BIP Investment Partners S.A. increases its equity participation in the capital of KeyDrive S.A.

BIP is pleased to announce its financial support of the acquisition by KeyDrive S.A. of Moniker and SnapNames from Oversee.net.

Moniker is a US based registrar, providing registration, domain management and other ancillary services. With about 2 million domains under management, Moniker ranks among the top 10 ICANN¹ registrars for generic TLDs². SnapNames is a leading global provider of domain name auction and brokerage services.

These transactions are in line with KeyDrive's strategy to participate in the consolidation of the domain names and services market and grow through acquisition. KeyDrive's combined group will now rank 6th among the top ICANN¹ registrars with more than 6 million domains under administration.

The funding for the transactions was provided by BIP together with KeyDrive's majority shareholder is inter-services GmbH as well as a loan from BGL BNP Paribas S.A. As a result of these transactions BIP increased its participation in KeyDrive S.A. to 33.3%.

BIP initially invested in Key-Systems, a German based registrar in 2009. At the end of 2010 Key-Systems acquired NameDrive, a world leader in domain parking. Both entities were subsequently integrated into a new company named KeyDrive in 2011.

¹ ICANN - The Internet Corporation for Assigned Names and Numbers

² TLD - Top-level domain

About BIP Investment Partners S.A. (BIP)

BIP is a Luxembourg investment company listed on the Luxembourg stock exchange investing in listed and unlisted entities operating mainly in Germany, in the Benelux and in France.
